OBJECTIVE

Results-driven web developer with a keen analytical mindset, unwavering motivation, and a strong work ethic. Adept at designing, debugging, and troubleshooting applications using a diverse set of coding tools and languages. Eager to contribute to innovative projects and collaborate with dynamic teams to achieve technological excellence.

Other interests

TECHNICAL SKILLS

Bootstrap Libraries

Database Systems [PostgreSQL]

HTML, CSS & JAVASCRIPT

API Development: REST

Python, Django

Version Control Tools: GitHub

SKILLS

- Teamwork
- Career motivation
- Decision making
- Communication
- Problem-solving
- Result orientation

WORK EXPERIENCE

Web Developer

Since May 2023 Freelancing Nairobi

Participated in coding communities, online forums, and GitHub to collaborate and showcase my projects.
Actively engaged in continuous learning to stay updated on web development trends and technologies.

KEY ACHIEVEMENTS

Implemented User Authentication and Authorization

Continuous Learning and Skill Expansion

Collaborated in Open-Source Projects

Ensured Code Quality and Maintainability

Developed and Deployed Web Applications

Integrated RESTful APIs

PROJECT

Chat App In this personal project, I designed and developed a modern and feature-rich chat application, aiming to provide users with a seamless and engaging communication experience. On this project I for showed my skills on user authentication and security, user profile customization and responsive design.

PROJECT

Personal Portfolio Created a portfolio website to display my coding projects, complete with project descriptions and live links. Demonstrated strong HTML, CSS, Bootstrap and responsivedesign skills.

Hospital Management System As a developer, I undertook the development of a Hospital Management System (HMS) project. This system aimed to streamline administrative and operational functions within a healthcare facility. Key features included patient management, appointment scheduling, billing and payment processing, and a centralized database for storing patient records**.**

Ecommerce Website: In this project, I had the opportunity to design and optimize an e-commerce website for a fashion industry. The primary goals were to improve the user experience, enhance visual appeal, and boost online sales. I made sure I understand the brand, target audience, and specific needs, ultimately delivering a modern, responsive, and user-friendly e-commerce platform.

EDUCATION

Cyber security awareness
From May 2019 to August 2022 Udemy Kenya
Certificate

Kenya Certificate of Secondary Education
From 2014 to 2017 Gatunguru Boys Highschool Kenya
